## DETAILED ACTION

\*\*\* This office action is in response to Applicant's amendment and Terminal Disclaimer filed July 10, 2007. Claims 1-17 were canceled. Claims 18-29 are currently pending.

\*\*\* The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

2. Claims 18-29 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6,372,534 and claims 1-10 of U.S. Patent No. 6,376,270.

Although the conflicting claims are not identical, they are not patentably distinct from each other because they are drawn to the same subject matter for forming a thin film transistor array, whereby the present base claims 18, 22 and 26 of this application are broad enough to encompass the scope of claims 1, 5 and 9 of the Patent No. 6,372,534, respectively, and claims 1-10 of Patent no. 6,376,270, and wherein claims 18-29 are respectively anticipated by claims 1-12 of the Patent No. 6,372,534. Employing an organic insulating film or a photo-imageable polyimide insulating film having low dielectric constant for reducing crosstalk in forming a liquid crystal display device would have been obvious to ordinary skill in the art, wherein alternatively using a photosensitive polyimide layer or a non-photosensitive polyimide layer is well known in the art.

Art Unit: 2822

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

### ***Double Patenting***

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

4. Claims 26-29 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 9-12 of the U.S. Patent Numbers 6,372,534, in which Claims 26-29 are identical to claims 9-12, respectively. This is a double patenting rejection.

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

### **Response to Amendment**

5. Replacements of the drawing sheets filed on July 10, 2007 are approved and accepted.

6. The terminal disclaimer filed on July 10, 2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent Numbers 6,372,534 and 6,376,270 have been reviewed and is NOT accepted, since the Attorney is not of record and there is no registration number provided therein.

An attorney or agent, not of record, is not authorized to sign a terminal disclaimer in the capacity as an attorney or agent acting in a representative capacity as provided by 37 CFR 1.34 (a). See 37 CFR 1.321(b) and/or (c).

Accordingly, the obviousness-type double patenting rejection is maintained.
